### PROJECTS

#### • Code Editor

I've created a code editor in which any random student can do practice of html, css and javascript on the same page with their corresponding outputs. and with the help of this editor they'll get a good idea about syntax of html, css and javascript.

#### • Notes-App

For Making this Notes-App, i used html, css and pure javascript. In this Notes-App any random person can visit and save their Important notes frequently.

#### • Calculator

For making this calculator i used html, css and javascript. with the help of this calculator you can easily find out any arithmetic operation.
